

Soil Treatment with Soil Conditioner

MATERIALS

PROCEDURE

For seeds:

- 

Take seeds for 1000 square meters, and wet them.
- 

Mix Soil conditioner and wet seeds to be average to each seed.
- 

Keep the mixture in cool place for 8-12 hours before planting.

For Melons, vegetables and tobaccos:

- 

Mix the Soil Conditioner and Soil with the amount of water to be mushy.
- 

Stain the mushy up on the roots before transplanting

Attention: Seal after using.
Avoid sun exposure.
Use constantly after opening.
